Recommendation of Thomas Byskov Tønder

It is my pleasure to commend Thomas Byskov Tønder on his abilities as a university student. I have had Thomas in my classes at the Technical University of Denmark (DTU) and I supervised his bachelor project.

During that time, I have witnessed him showing great care in managing his time and working for solo projects, as well as his strengths in team working as part of a group. He has shown exceptional talent in algorithmic and artificial intelligence studies. Thomas takes a keen interest in his work and in that it is done properly. He has demonstrated that he does not give up prematurely and works until he finds the result satisfactory. Furthermore, he is eager to learn and works with great enthusiasm.

In my classes he has always taken an interest in communicating with his classmates to discuss exercises and projects. He is an active student who works to get the most out of his studies by using any opportunity to learn from and with other people.

I highly recommend Thomas for studies abroad at RMIT in Australia. I am confident he will make an excellent addition to your university's community. Please feel free to contact me if you have any questions regarding his person or past academic work.

Sincerely,

A handwritten signature in blue ink, appearing to read 'C. Witt', with a stylized flourish at the end.
